vulnerability type : directory

vulnerability description : It particularly increases the exposure of sensitive files within the directory that are not intended to be accessible to users, such as temporary files and crash dumps. Directory listings themselves do not necessarily constitute a security vulnerability.

poc : attached with this mail

Dear Researcher,

1. We acknowledge the vulnerability on Directory listing reported by you.
2. We are in the process of closure of this issue. You may like to recheck this issue in some time and revert to us if there are any further discoveries on vulnerabilities.
3. Usually it takes approximately three weeks to have an issue closed.

Thank You
Team RVDP, NCIIPC
